TECHNICAL SKILLS

Frontend

Angular, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Ionic, PrimeNG, Signals

Backend

C#, ASP.NET Core, .NET Core, Node.js, REST API, API Integration, SFTP/API

Database

SQL Server, MySQL, MongoDB, Stored Procedures, SSRS, Crystal Reports

DevOps

Git, GitHub, GitHub Actions, IIS Server, Jira, VS Code, Postman, Figma

Practices

Business Analysis, System Design, Auth, Keycloak, CI/CD, Documentation, AI Workflow

CORE EXPERTISE

Enterprise Web Applications
Warehouse Management Systems
Transport Management Systems
ERP Support & Integration
REST API Development
Dashboard & Admin Panel
Internal Tools Development
Database Design & SQL Reporting
CI/CD Pipeline Support
Authentication & Access Control
Business Process Analysis
AI-assisted Workflow
LINE OA Integration Concept
Documentation & Knowledge Base

PROFESSIONAL SUMMARY

Senior Full Stack Developer with 9+ years of experience building enterprise web applications, WMS/TMS platforms, ERP support tools, dashboards, reports, REST APIs, and internal workflow systems. Has worked with WMS-related systems since the first professional role through recent enterprise integration work. Strong background in Angular, ASP.NET Core, C#, Node.js, SQL Server, GitHub Actions, and practical business process analysis.

EXPERIENCE

Senior Programmer - Unbox.IT

Nov 2023 - Present

- Develop and improve WMS interface features, integration workflows, and enterprise web app modules.
- Work with SFTP/API data exchange, Keycloak authentication, and WMS platform improvements.
- Support CI/CD pipelines using GitHub Actions and self-hosted runners.
- Build internal tools that improve operational visibility and reduce manual work.

Systems Analyst / Senior Programmer - Techsoft Holding

Jun 2023 - Nov 2023

- Collected user requirements and analyzed business processes for enterprise software projects.
- Prepared business documents, SIT documents, and UAT support materials.
- Assessed system design and coordinated with users and developers.

Senior Programmer - Yamato Unyu (Thailand) Co., Ltd.

2019 - 2023

- Built and maintained TMS, WMS, back-office, dashboard, and customer survey web applications.
- Supported transport and warehouse workflows through internal systems and reporting tools.
- Improved database queries, operational reports, and business workflow visibility.

Programmer - Panjawattana Plastic Public Company Limited

2015 - 2019

- Started professional WMS and warehouse system experience through ERP and scanning workflows.
- Created warehouse handheld scanning tools using ASP.NET and C#.
- Built Crystal Reports and SSRS reports for operational and management use.

SELECTED PROJECTS & ENTERPRISE WORK

MooPing Reward

Angular 22 loyalty web app with POS confirmation, customer display, saved rewards, and LINE OA mock notification.

ApoRaviz Portfolio

Angular portfolio hub with profile, skills, project screenshots, and live demo links.

ApoRaviz Workspace Docs

VitePress documentation hub for project rules, Angular/Tailwind lessons, and reusable knowledge.

Split Order TXT Tool

Node.js/TypeScript CLI utility that splits order TXT files by group number with automated tests.

Confidential WMS/TMS/ERP

Enterprise warehouse, transport, ERP, dashboard, and reporting systems across multiple company roles.

WORKING STYLE

- Practical developer who turns unclear workflows into usable systems.
- Comfortable with business users, requirements, documents, testing, and maintenance.
- Values readable code, useful UI, clear documentation, and steady improvement.
